U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF EXPERIMENT STATIONS.

CIRCULAR No. 18.

L I S T
OF
ORIGINATORS OF FRUITS AND VEGETABLES
IN THE
UNITED STATES,
WITH
ADDRESSES AND NAMES OF SPECIALTIES.

PUBLISHED BY AUTHORITY OF THE SECRETARY OF AGRICULTURE.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF EXPERIMENT STATIONS,
Washington, D. C., February, 1891.

SIR: At the request of the agricultural experiment stations this Office prepared in March, 1889, a list of persons engaged in originating or improving varieties of fruits, vegetables, etc. The following is a revision of that list, prepared by a committee appointed by the Association of American Agricultural Colleges and Experiment Stations, and its publication is recommended for the use of the stations.

Respectfully,

W. O. ATWATER,
Director.

Hon. J. M. RUSK,
Secretary of Agriculture.

INTRODUCTION

At the convention of the Association of American Agricultural Colleges and Experiment Stations, held in Washington in 1889, a subcommittee to revise the list of originators of fruits and vegetables was appointed.

In order that the list might be as complete as possible blanks were sent to each of the originators whose names appeared in the old list, asking for a list of the specialties they were at work on and for the names of persons who were known to be engaged in like work. Similar blanks were sent to the horticulturists of the various stations. From the returns thus obtained the following lists have been compiled. A change has been made in the arrangement by which the names of the persons engaged in improving any particular kind of fruit are placed together in alphabetical order. Whenever the varieties were named it has been indicated in the right-hand column. Many of the originators signified their desire to distribute their varieties for trial to the different stations, and such cases are indicated by the letter (d) after the address. It must not be understood that where no (d) occurs the parties decline to distribute, as in the majority of cases these names have been furnished by other originators and we have had no correspondence with the parties themselves.

Parties having promising varieties of fruits or vegetables are urged to send plants or seeds to a number of the stations in order that they may have a thorough trial before being placed on the market.

In addition to the list of originators we have thought best to include the names of such introducers as make a specialty of novelties, and have added lists of nurserymen and seedsmen whose catalogues are likely to contain descriptions of new varieties.
